

8.0 SYSTEM OUTPUTS

Appendix B contains examples of the types of printouts and data displays of highway-rail crossing data which are available to States, railroads, and others. Included in the samples are the following:

- a. Outputs from the Accident Prediction Programs.
- b. Outputs from the Resource Allocation Programs.
- c. Several examples from programs which count the number of crossings for various purposes. These outputs may be produced for a State, railroad, or county and sorted as required.
- d. Listings of Inventory data. These reports may be generated for a State or a railroad and sorted as desired. Specific selection criteria may vary and include such as "all crossings with no warning devices," "all crossings with gates," "all private crossings," "all crossings with no pavement markings," etc.
- e. An Accident/Incident Report.
- f. A number of examples of fill-in-the-blanks lists for mass updates.
- g. Special information reports.

<p>NOTE: In addition to the examples presented in this document, other specially tailored reports may be obtained by direct request from FRA.</p>
